

OKY1024

Product Name: UNO R3 Starter Kit 1602 LCD Servo Motor Dot Matrix Breadboard LED for Arduino kit02

Product Model: OKY1024

Quick Details:

1. Completely compatible and improvement for Arduino UNO R3.
2. You'll learn through building several creative projects.
3. More stable stabilivolt chip (5V/3.3V).
4. Starting the basics of electronics, to more complex projects.
5. The kit includes a selection of the most common.
6. The kit will help you control the physical world with sensor and actuators.

Product Description:

This kit walks you through the basics of using in a hands-on way. You'll learn through building several creative projects. The kit includes a selection of the most common . Starting the basics of electronics, to more complex projects, the kit will help you control the physical world with sensor and actuators.

This kit is designed to get you started quickly and easily on your path of learning electronics. Once you've received your starter pack you can start to play with little or no electronics and programming experience.

The advanced kit has more components and sensors you need to play compared with the Starter Kit.

The Main board included in the Kit is Makerduino, which is totally compatible and improvement for Arduino UNO R3. Please check the product page for more details.

product List:

KIT LIST	Number
2012 UNO R3 Board	1
Mini Breadboard shield with mini board	1
830 points Breadboard	1
SMD components bo	1
LED red yellow green	15(each 5pcs)
Buzzer	2
Switch	4
Digital tube	2
Mercury switch or ball switch	2
Photoresistor	3
Potentiometer	1
Flame sensor	1
Infrared receiver	1
Resistance 220R, 1K, 10K	15(each 5pcs)

LM35 Temperature sensor	1
USB Cable	1
Male to male jumper wire	30
9V battery clip	1
IR mini remote control	1
1602 LCD LCD module	1
9G Servo	1
5V stepper motor + ULN2003 driver board	1
74HC595	1
8*8 DOT MATRIX	1
