

OKY2018

Product Name:USB PIC Automatic Programming Develop
Microcontroller EEPROM Programmer K150 ICSP
Cable

Product Module: OKY2018

Product Description:

- 1.Support the most popular programming PIC chips, read, encryption and other features.
- 2.No external power supply, communication and power is only a USB cable to print complete, without any cable.
- 3.PICSTARTPLUS much faster rate than programming.
- 4.Can easily read the contents of the chip program area.
- 5.Automatic programming verification.
- 6.Comprehensive information prompts, allowing users to understand the working state.
- 7.With 40pin ZIF programming of the seat, can be directly programmed in 8-pin to 40 pin PIC microcontroller chip can be programmed using ICSP online or add conversion blocks.
- 8.8 pin 40 pin-board outside the chip can be downloaded directly online ICSP output.
- 9.Compatible with Windows98 and Windows2000/NT, Windows XP / Windows 7 and other operating systems.
- 10.Programming software provides easy to use instructions.

Package Included

| Packing List | Qty |
|------------------------|-----|
| Programmer | 1 |
| High quality USB cable | 1 |
| ICSP cable | 1 |
