

OKY2101

Product Name: Ethernet Shield W5100 Main Board UNO ATmega 328 1280 MEGA2560
For Arduino

Product Module: OKY2101

Quick Details:

Chip	W5100 Ethernet Chip
Network (IP) stack capable	TCP and UDP
Other feature	Micro SD card slot
Weight	30g
Apply	UNO as well as Mega, 1280/2560

Product Description:

- **With this Ethernet Shield, your board can be used to connect to internet.**
- **Can be used as server or client.**
- **Directly plug puzzle board, no soldering required.**
- **Controller: W5100.**
- **This is the latest version of the Ethernet Shield.**
- **This Ethernet Shield which is based on the W5100 Ethernet Chip gives you an easy way to get your Online.**
- **It is directly supported by official Ethernet Library.**
- **It adds a micro-SD card slot, which can be used to store files for serving over the network.**
- **It is compatible with the (168 or 328), UNO as well as Mega (1280/2560) and can be accessed using the SD library.**
- **The W5100 provides a network (IP) stack capable of both TCP and UDP.**
- **It supports up to four simultaneous socket connections.**
- **Use the Ethernet library to write sketches which connect to the internet using the shield.**

Package Included

1PCS X Ethernet W5100 shield
