

2104

Product Name:MEGA 2560 PCB Prototype Shield Prototyping V3 Expansion Board

Product Module: OKY2014

Quick Details:

Input Voltage	7-12V DC
Output Voltage	5V/3.3V
Size	20cm x 15cm x 4cm
Bread Board Size	45.5x34.5x9.5mm
Materials	Plastic, PCB
Net Weight	43g

Product Description:

- 1.MEGA Proto Shield V3 Gold Plated PCB processing technology, motherboards, small gold square pad spacing, welding components easier.
- 2.SOP28 SMD component package to be more handy electronics enthusiasts will not be directly insert bound components.
- 3.The board can not only receive MEGA seamless plug controller, directly soldered to the above components to complete a variety of prototype circuit, you can paste Mini bread board, through the 7-color jumper to complete a variety of circuit experiment , board integrated power indicator and status lights, and reset buttons, easy to learn MEGA preferred prototype controller expansion board.
- 4.Full Compatible with Mega ATmega1280 ,Mega ATmega2560

Package Included

1PCS X ProtoShield V3.0

1PCS X Mini Breadboard 170 points.
