

OKY3066

Product Name: LM35 Temperature Sensor For Arduino

Product Module: OKY3066

Product Description:

- 1.Brand new LM35 linear temperature sensor module.
- 2.Ideal MCU testing and DIY projects.
- 3.Temperature range: -40 °C ~ 150 °C.
- 4.Sensitivity: 10 mV / C.
- 5.It is convenient to combine with the sensor for arduino.
- 6.Material: printed circuit board.
- 7.Weight: 5 g.

Package Included

Packing List	Qty
temperature sensor module	1
