

OKY3104

Product Name: Photosensitive Resistance Sensor Module Light Sensor For Arduino

Product Module: OKY3104

Product Description:

1. For Light intensity detected, light brightness sensors, smart car module.
2. Using the sensitive type photosensitive resistance sensor.
3. Waveform of the comparator output signal is good, strong driving ability.
4. With adjustable potentiometer can adjust and detect the brightness of the light.
5. Come with bolt holes for easy installation.
6. Working voltage: 3.3-5V.
7. Output format: digital switch output (0 and 1).
8. Mini PCB size: approx. 3.2cm*1.4cm/1.25*0.55".

Package Included

Packing List	Qty
Photosensitive Resistance Sensor Module	1
