

OKY3108

Product Name:4 Way Photodiode Photosensitive Sensor Module
Kits LDR Light Sensor Price

Product Module: OKY3108

Product Description:

1. Using photosensitive resistance sensor.
2. The comparator output signal is clean, good waveform , driving ability , more than 15mA.
3. Adjust the sensitivity of digital distribution.
4. The working voltage 3.3V-5V.
5. The output format : digital switching outputs (0 and 1).
6. A fixed bolt holes for easy installation.
7. A small PCB board size : 3.2cm x 1.7cm.
8. Using a wide voltage LM393 comparator.

Package Included

Packing List	Qty
Photosensitive sensor module kits Light detection Photoresistor module	1
