

## OKY3126

**Product Name:** 4 Channel Photodiode Sensor Light Sensor Module  
LM339 Light Control Sensor

**Product Module:** OKY3126

### Product Description:

1. Using photodiode sensors.
2. The comparator output signal is clean, good waveform , driving ability , more than 15mA.
3. Adjust the sensitivity of digital distribution.
4. The working voltage: 3.3V-5V.
5. The output format: 4 digital switching outputs ( 0 and 1 ).
6. A fixed bolt holes for easy installation.
7. The control panel: 3.2cm x 4.4cm ( length × width × height ).
8. Using a wide voltage LM339 comparator.

### Package Included

Packing List	Qty
4 Channel Photodiode Photosensitive Sensor Module	1
