

OKY0114

**Product Name:5MM SuperFlux Piranha LED Lamp Full Color
CommonAnode Multi-Color Led(1000Pcs/Lot)**

Product Module: OKY0114

Product Description:

- 1.The LED input voltage 4.5V ~ 6.5V, built-in LDO.
- 2.The on-chip voltage regulator tube, power supply end series resistance to IC VDD feet, without external regulator.
- 3.The gray level adjusting circuit (256 brightness adjustable).
- 4.Dual built-in RC oscillator, and according to the data signal line for clock synchronization, after receiving the data of the unit can automatically the follow-up data were shaping forwarding.
- 5.The built-in power on reset circuit.
- 6.The PWM control terminal can achieve the 256 level adjustment, scanning frequency of not less than 400Hz/s.
- 7.The cascade interface serial interface, via a signal line to complete the receiving and decoding of data.
- 8.When the refresh rate of 30 frames per second, the number of cascade low speed mode is not less than 512 points, the high-speed mode is not less than 1024 points.
- 9.The data transmission speed of up to 800Kbps.
