

## OKY1211

**Product Name:** RFID Learning Kit Starter Kits With 830 Point Breadboard DHT11 Temperature Sensor

**Product Module:** OKY1211

### Product List :

| Kit List                                                                | Qty |
|-------------------------------------------------------------------------|-----|
| Resistance package<br>(1K 5pcs+10K 5pcs + 220R 8pcs )                   | 1   |
| The LED package ( red light 5pcs + yellow light 5pcs +blue light 5pcs ) | 1   |
| Suit key                                                                | 1   |
| NFC read-write card module                                              | 1   |
| L9110 fan module                                                        | 1   |
| TTP229 16-way touch switch                                              | 1   |
| SR04 ultrasonic module                                                  | 1   |
| LED matrix module                                                       | 1   |
| GPIO extension plate V3                                                 | 1   |
| 50K adjustable potentiometer                                            | 1   |
| DHT11 temperature and humidity<br>on the red board                      | 1   |
| ADXL345 digital triaxial                                                | 1   |
| 10 mm highlight full-color LED                                          | 1   |
| 0.96 inch highlight OLED module                                         | 1   |
| The bread line 30PCS                                                    | 1   |
| GPIO 40 p rainbow row line                                              | 1   |
| Male to female dupont line 20pcs                                        | 1   |
| 830 hole quality bread board                                            | 1   |
| Black remote control                                                    | 1   |
| Yellow keys                                                             | 1   |
| ULN2003 stepper motor driver module                                     | 1   |
| 5V single channel relay module                                          | 1   |
| water level sensor module                                               | 1   |
| 9g servo                                                                | 1   |
| HC - 06 bluetooth module                                                | 1   |
| PCF8591 module                                                          | 1   |
| The one digital tube                                                    | 1   |
| The four digital tube                                                   | 1   |
| 74hc595 IC                                                              | 1   |
| Rotary encoder                                                          | 1   |

|                                                  |   |
|--------------------------------------------------|---|
| DS3231 precision clock                           | 1 |
| 5V deceleration stepper motor                    | 1 |
| PS2 game rocker arm module                       | 1 |
| MQ-5 liquefied petroleum gas,<br>methane sensors | 1 |
| High quality plastic box                         | 1 |

## Package Included

1×PCS    RFID learning kit
