OKY2222

Product Name: UNO R3 Mega 2560 Wireless Network Processor CC3000 WiFi Shield For Arduino

Product Module： OKY2222

Product Description:

1. Embedded IPv4 TCP / IP stack.

2. The radio industry's best performance.

3. Tx Power: 11Mbps is + 18dBm, CCK.

4. Rx sensitivity: -86dBm, 8% packet error rate (PER), 11Mbps.

5. Compact package with low memory handle millions of instructions.

6. By the US Federal Communications Commission (FCC).

7. Available hardware design files and design guides from Texas.

8. Integrated Crystal and power management.

9. Small footprint module: 16.3mm x 13.5mm x 2mm.

10. Operating temperature range: -20 ° C to 70 ° C.

11. Based on Texas Instruments (TI) has verified the 7th generation of Wi-Fi Solutions.

12. Including user, sample applications, and complete platform solutions that support community.
