

OKY3370

Product Name:ESP8266 ESP-12E ESP-12F ESP-07 Wifi Transceiver Adaptature Module

Product Module: OKY3370

Description:

Used to convert the IO ports of ESP-07 (ESP-12,ESP-12E,ESP12F) to 2.54mm pitch pin headers, so it is easy for beginner to test the module.When you want to use the adapter board with the 3.3v regulator and apply 5v to the board, you also need to desolder the middle SMD resistor on the adapter board.

Features:

Before use, the user should first follow these steps:

Firstly, Solder the ESP-07 or other module to the adapter board

Secondly, Solder the 3.3V regulator to the bottom of the adapter board

Thirdly, Solder the 1X8P pin header to the adapter board

Not included ESP8266 Module

Because there is a 3.3v regulator onboard, the range of VCC pin on the adapter board can be 3.3V to 5V

Note: Lighting, display and other factors may cause COLOR SHADING, please comprehensive pictures and text descriptions to determine!

Package Includes:

1 x Wifi Transceiver Adaptature Module
