

OKY3408

Product Name:FTDI Basic Program Downloader USB To TTL
FT232RL For Arduino

Product Module: OKY3408

Product Description:

- 1.Standard interface, compatible with all kinds of official controller for arduino.
- 2.Original FT232 chips, stable performance.
- 3.With a power supply, send, receive light, working condition be clear at a glance.
- 4.With 3.3 V and 5 V power supply options.
- 5.To do turn ordinary USB serial port using TTL module, download on STC microcontroller.
