

## OKY3428

**Product Name:** Smart Car LM393 Touch Sensor Button Detection Switch Sensor Module For Arduino

**Product Module:** OKY3428

### Product Description:

1. Dimensions: Length 45mmX wide 18mmX high 5mm.
2. Main devices: op amp transistor.
3. Operating voltage: DC 3-5V.
4. Output TTL level signal indication.
5. Output IO ports can be connected directly to the microcontroller.
6. The relay module can be individually controlled.
7. Continuous work.

### Package Included

Packing List	Qty
Smart Car LM393 Touch Sensor Button Detection Switch Sensor Module	1
