

OKY3514

Product Name:5V Infrared Obstacle Avoidance Detector Tracing Sensor Module

Product Module: OKY3514

Product Description:

- 1.Tracing sensors, the robot produced essential.
- 2.Use infrared light to detect anti-interference ability.
- 3.Sensors to adopt CTRT5000 high sensitivity, stable performance.
- 4.Working voltage of 5V, the output of the black line low, white line of high output.
- 5.Exquisite workmanship, with indicator.
- 6.Has a fixed bolt hole for easy installation.
- 7.Application: Intelligent Vehicle Tracking.
- 8.Working Voltage :5V.

Package Included
