

OKY3518

Product Name: 4-way Infrared Obstacle Avoidance Sensor Tracking Sensor Infrared Sensor Module

Product Module: OKY3518

Product Description:

- 1.This module is designed for smart car, robot and automated machine; It provides a kind of multifunction infrared detective system for the auto-machine; This module adopts infrared transmitter , receiver and components as a detector.
- 2.Operating Voltage: DC 3.3V-5V.
- 3.Operating Current: try to choose more than 1A power supply.
- 4.Working temperature: -10 °C - +50 °C .
- 5.Install Aperture: M3 screws.
- 6.Detection range: 1mm to 60cm adjustable, the closer the more stable performance, white reflective distances.
- 7.Size:42mm×38mm×12mm (length × width × height).
