

OKY3525-1

Product Name:16x16 RGB LED Matrix Microcontroller LED Dot Matrix Display Module

Product Module: OKY3525-1

Product Description:

- 1.16x16 LED Dot Matrix Display Module Kit Compatible Interfaces.
- 2.Supply Voltage: DC5v.
- 3.Principle: Each row consists of two 74HC138 decoder composed of 4-16 + transistor drive; each column cascade driven by the two 74HC59; when the line output high, low cross point of the column output LED is lit.
4. LCD12864 compatible interfaces, plug and play.
- 5.Rich routines provide 51 for microcontroller and routines.

Package Included
