

## OKY3551

**Product Name:**Endstop Mechanical Limit Switch Limit 3D Printer Switch

**Product Module:** OKY3551

### Description:

Collision module and number 13 interface structures, simple circuit, the built-in LED flasher make collision. Using digital interface with leds, 13 will crash sensor access number 3 interface, when the collision sensors sensor to have a collision signal, motherboard with module of leds light up at the same time.

### Features:

100% brand new and high quality

Forefront of a switch module is installed there is a collision, the module output low, there is no collision, the output high.

Module aside M3 mounting holes to facilitate fixed in a small car.

Lights with a switch, there is a collision, lights, no collision, lights out.

Vcc 3v-12v power supply

Gnd connected to power ground

OUT output high and low

Size:(L\*W\*H)3.55\*2.20\*0.61cm/1.40"\*0.87"\*0.24"

Quantity:1Pc

### Package Included

1PCS x Endstop Mechanical Limit Switch Limit 3D Printer Switch
