OKY4005

Product Name: 1602 16×2 Character LCD Display Module For Arduino

Product Module： OKY4005

Product Description:

1. As we all know, though LCD and some other displays greatly enrich the man-machine interaction, they share a common weakness. When they are connected to a controller, multiple IOs will be occupied of the controller which has no so many outer ports. Also it restricts other functions of the controller. Therefore, LCD1602 with an I2C port is developed to solve the problem. It is also simple to handle. It has only two bidirectional data lines, a serial data line and a serial clock one.

2. How to wire: GND-GND; VCC-VCC; SDA-A4; SCL-A5.

3. Used to display Characters, letters and Numbers.

4. With a potentiometer used to adjust backlight and contrast.

5. Power supply: +5V.
